RESOURCES FOR PHOTOGRAPHERS

## raw presets installation: ACR

raw presets installation: ACR

### INSTALLATION

1. Windows XP Users, extract your Presets Zipfile to  
C:\Documents and Settings\

\*Vista users extract to:

C:\Users\

\*\*\*some folders may be hidden, so you can A) go to 'Tools', 'Folder Options', 'View', and select 'show hidden files and folders', or; B) enter this address in Windows Explorer.

2. MAC Users, extract your zipfile to:

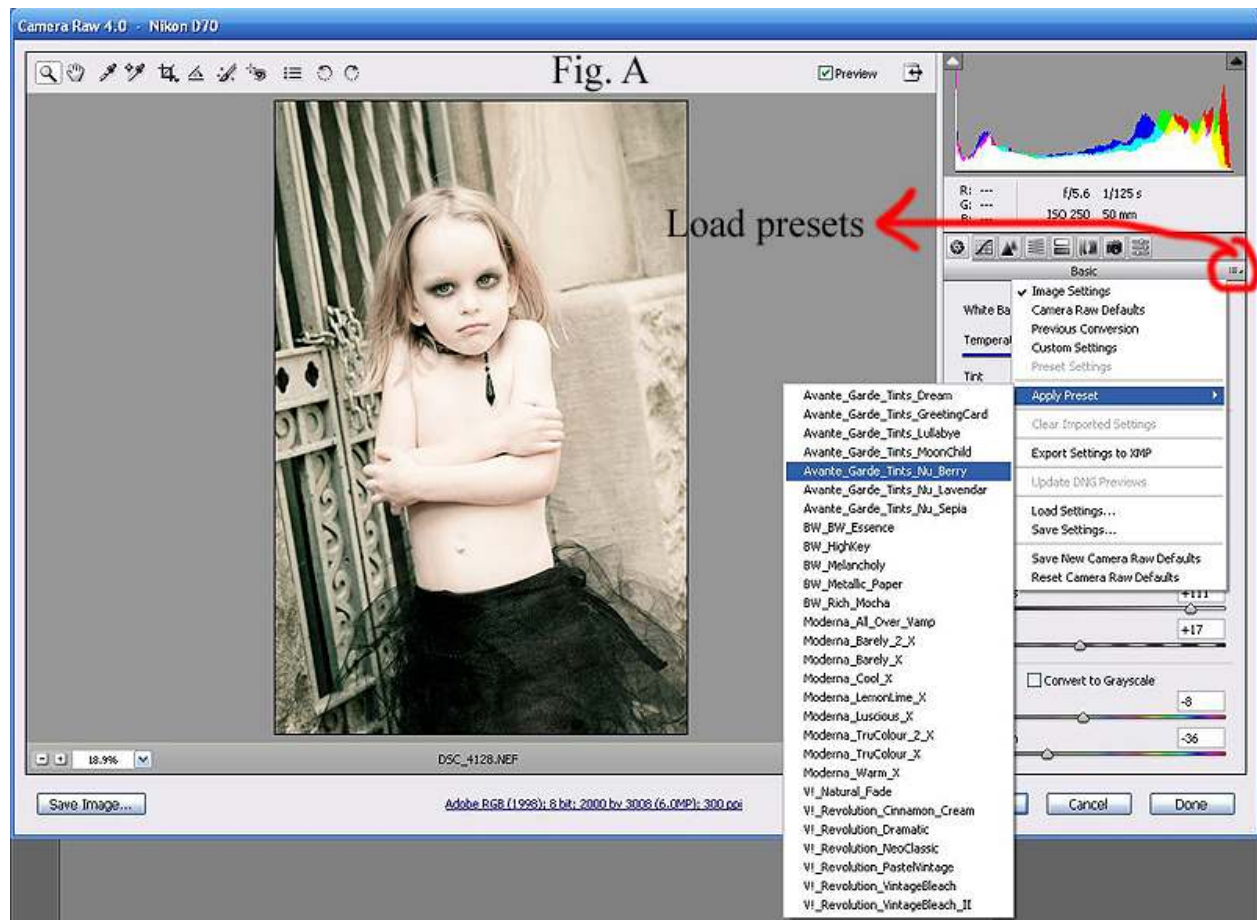

~/Library/Application Support/Adobe/Camera Raw/Settings

### USING YOUR NEW ACR PRESETS

\*\*\*\*\*PLEASE NOTE!!!\*\*\*\*\*

THERE ARE TWO VERSIONS OF EACH PRESET! ONE REGULAR VERSION, AND ONE TWEAKED FOR INDOOR/STUDIO LIGHTING.

1. Open your RAW file for processing.
2. Select the desired preset from your preset list, in your Basic Editing window. (See Fig. A).

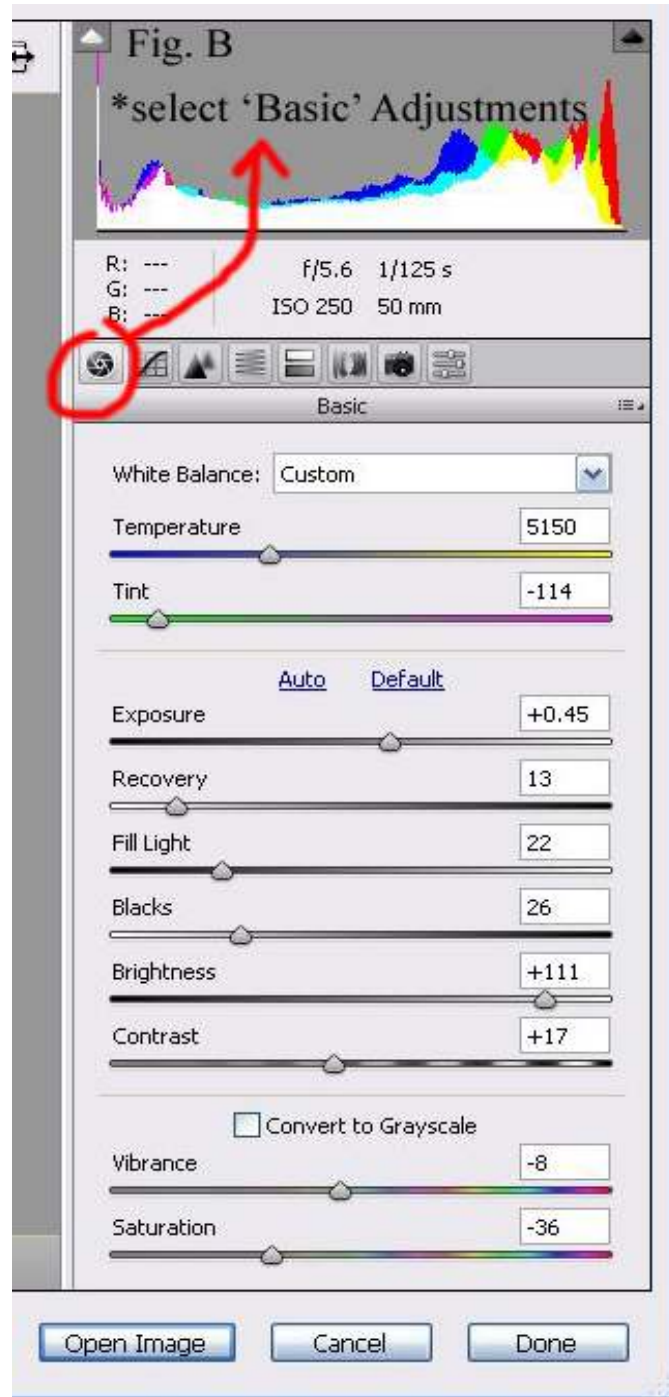

3. Tweak the image using your 'Basic' Window (See Fig. B). The presets were designed with minimal tweaking in mind, thus optimizing your processing time.

**\*\*\*Most presets can be balanced out adjusting only the exposure and contrast bars\*\*\***

4. Use 'Auto' to get quickest results - minimizes your need to experiment.

5. White Balance must be set correctly for best results. If you get color that is too dramatic, try using either the 'Auto' or 'As Shot' Settings.

**Hope this has been helpful!!!**
